

DVDs Produced by Maritime Training Services

Access Control: Threat Awareness and Prevention
Throughout maritime history, there have been those who would attempt to board ships and boats illegally. This video focuses on how you and your crew can become more aware of the potential for these situations, improve the efficiency of your onboard security team, and take proactive steps to prevent unauthorized access to your vessel.

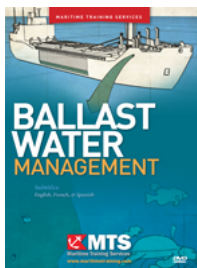

Subtitles: ENG, SPA
Item no: DVD0-18
Length: 14 minutes
Price: \$200.00

Back Care and Strength Building: Move Right and Stay Safe

One out of every five working seafarers sustains a back injury on the job, and 90% of lost-time claims in the maritime industry are related to back problems. This video focuses on how you and your crew can prevent many or most of these injuries by practicing simple, proven methods of stretching, building strength, improving posture, and working more safely.

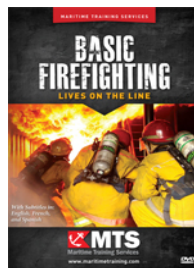

Subtitles: ENG, SPA
Item no: DVD0-53
Length: 18 minutes
Price: \$250.00

Ballast Water Management

Improper ballast water discharge contributes to the spread of invasive species around the world and leads to significant health risks, environmental damage, and economic costs. This video shows you how to comply with the latest regulations by identifying and implementing approved ballast water procedures. Failure to comply can lead to detention by Port State Control, invalidation of certificates, and fines.

Subtitles: ENG, FRE, SPA
Item no: DVD0-57
Length: 14 minutes
Price: \$250.00

Basic Firefighting: Lives on the Line

Fighting fires on ships requires special knowledge, training, and skills. This video outlines the STCW's eight essential steps in basic firefighting and reinforces the importance of conducting on-board firefighting drills. Interviews with maritime fire safety experts and amazing footage from the "Fire Dragon" simulator ensure that you and your crew will be fully prepared when lives are on the line.

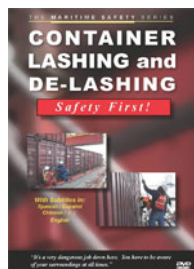

Subtitles: ENG, FRE, SPA
Item no: DVD0-46
Length: 13 minutes
Price: \$250.00

Bunkering Operations: Safe Oil Transfer Procedures

It's vitally important that your crew knows how to transfer fuel oil to your vessel's bunkers safely, cleanly, and legally. This video covers all of the important compliance-related, procedural, and practical aspects of the bunkering process. You and your crew will be walked through the specific steps involved in performing a safe, efficient oil transfer on your ship.

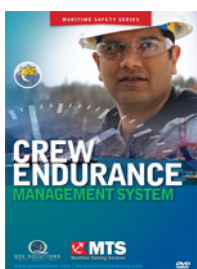

Subtitles: ENG, FRE, SPA
Item no: DVD0-01
Length: 20 minutes
Price: \$250.00

Container Lashing and De-Lashing: Safety First!

Improper lashing or de-lashing on container ships can lead to personal injury and property damage. This video focuses on all of the key safety concerns and practices related to lashing cargo containers to the deck of your ship. You'll learn how to improve your lashing skills and minimize the risk of harm to yourself and your coworkers.

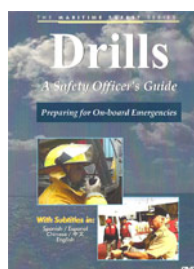

Subtitles: CHI, ENG, SPA
Item no: DVD0-28
Length: 12 minutes
Price: \$200.00

Crew Endurance: Live Better, Perform Your Best

Fatigue in the workplace can be very dangerous and potentially fatal, and this is especially true in the maritime industry. This video will help you and your crew understand, recognize, and address the factors that affect safe workplace performance on-board your vessel. Learn how to manage stress and individual risks and mitigate the adverse effects of environmental conditions.

Item no: DVD0-29
Length: 6 minutes
Price: \$300.00

Drills: Preparing for On-Board Emergencies

Conducting shipboard drills at appropriate intervals is a vital part of training your crew in the safe and efficient operation of your vessel. In this video, you'll learn how planning and running realistic on-board drills prepares crew members to respond effectively to a wide range of emergencies that can occur at sea or in port (including oil spills).

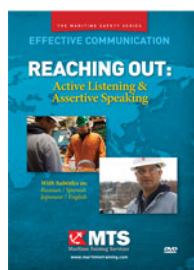

Subtitles: CHI, ENG, PER, SPA
Item no: DVD0-16
Length: 14 minutes
Price: \$200.00

Drug and Alcohol Prevention

The challenges and harsh realities of life at sea lead some seafarers to drug and alcohol abuse, and also the smuggling of illegal substances. This video focuses on the prevention of substance abuse issues onboard ships, awareness of warning signs that shipmates should watch for, and the best ways to respond to drug and alcohol-related or smuggling problems that occur.

Subtitles: ENG, FRE, SPA
Item no: DVD0-59
Length: 18 minutes
Price: \$250.00

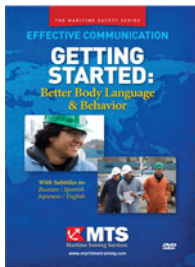

Effective Communication: Active Listening / Assertive Speaking

In this video, you'll see how mastering techniques for active listening and speaking to communicate more effectively on-board your ship will improve your crew's safety and performance. This second installment in a three-part series addresses understanding nonverbal cues and practicing assertiveness.

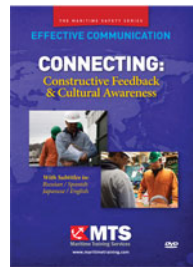

Subtitles: ENG, JAP, RUS, SPA
Item no: DVD0-42
Length: 15 minutes
Price: \$325.00

DVDs Produced by Maritime Training Services

**Effective Communication: Better Body Language and Behavior**

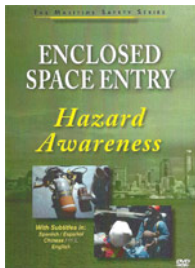

In this video, learn how to use efficient body language and speaking techniques to minimize seafaring incidents caused by human error. Recognize and overcome verbal and nonverbal idiosyncrasies that inhibit clear communication on your ship. This is the first installment in a three-part series.

Subtitles: ENG, JAP, RUS, SPA
Item no: DVD0-40
Length: 15 minutes
Price: \$325.00

**Effective Communication: Constructive Feedback and Cultural Awareness**

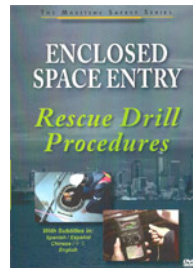

This video addresses learning and practicing basic English (specifically Maritime English), knowing the steps you can take to improve these skills, and using positive feedback in the workplace. This is the final installment in a three-part series.

Subtitles: ENG, JAP, RUS, SPA
Item no: DVD0-41
Length: 15 minutes
Price: \$325.00

**Enclosed Space Entry: Hazard Awareness**

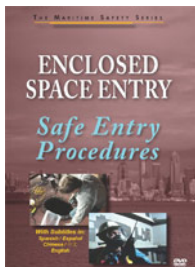

Entering an enclosed space on a ship or boat can often be a life-threatening operation. This video will help you mitigate these threats by being more aware of the hazards to avoid and knowing what you and your crew can do to maintain a safe work environment on your vessel at all times.

Subtitles: CHI, ENG, SPA
Item no: DVD0-25
Length: 14 minutes
Price: \$200.00

**Enclosed Space Entry: Rescue Drill Procedures**

If an accident occurs on your ship, you'll need a quick and reliable rescue. In this video, you'll see an actual crew perform an efficient rescue drill, using the appropriate protective gear and rescue equipment. Proper training reduces the risk of injury to anyone involved in an on-board rescue.

Subtitles: CHI, ENG, SPA
Item no: DVD0-27
Length: 8 minutes
Price: \$200.00

**Enclosed Space Entry: Safe Entry Procedures**

Whenever it's necessary to work in an enclosed space, a safe entry is a great start. This video focuses on the key elements of safe entries, including the roles that individual team members play. Get a detailed look at specialized equipment that's used for enclosed-space entries, and learn about preparations that can help ensure a safe, effective entry.

Subtitles: CHI, ENG, SPA
Item no: DVD0-26
Length: 14 minutes
Price: \$200.00

**Environmental Awareness: What You Can Do!**

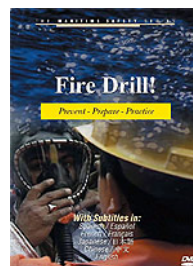

This video provides mariners with information about these important industry rules and the day-to-day practices that can reduce a ship's environmental impact. Good stewardship of the oceans starts with good training, and every seafarer can make a difference.

Subtitles: ENG, FRE, SPA
Item no: DVD0-45
Length: 12 minutes
Price: \$250.00

**Explosives! Search and Response Procedures**

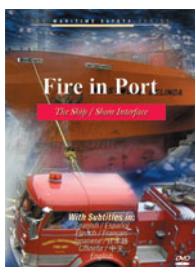

If you suspect there's an explosive device on your ship, it's critical that you and your crew know how to search for the device safely and efficiently and that you know what to do if you find it. This video addresses the threats posed by shipboard explosives and the security measures you can take to counter terrorism on your vessel.

Subtitles: CHI, ENG, SPA
Item no: DVD0-19
Length: 12 minutes
Price: \$200.00

**Fire Drill! Prevent, Prepare, Practice**

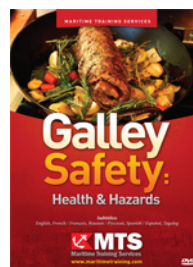

You need to be confident that the firefighting team on your vessel is truly prepared to confront a fire. The best way to achieve this level of readiness is to plan and conduct fire drills on a regular basis. With the assistance of the U.S. Coast Guard, this essential video covers subjects ranging from causes of fires to firefighting procedures.

Subtitles: CHI, ENG, FRE, JAP, SPA
Item no: DVD0-10
Length: 23 minutes
Price: \$250.00

**Fire in Port: The Ship/Shore Interface**

Get the most out of your crew's firefighting training and abilities. This video addresses the importance of communicating with the port during a fire on-board, developing a specific procedure for fighting a fire while your vessel is moored, and understanding the differences between at-sea firefighting and in-port firefighting. Learn the importance of communication with the port during a fire.

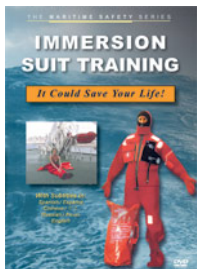

Subtitles: CHI, ENG, FRE, JAP, SPA
Item no: DVD0-11
Length: 17 minutes
Price: \$250.00

**Galley Safety: Health & Hazards**

The galley is as central and indispensable to a ship as the kitchen is to a home. This video addresses the safety precautions that all galley workers should practice, including wearing the proper attire and using the correct equipment for specific jobs. It also explains the "danger zone" and the importance of adhering to the "first in, first out" system.

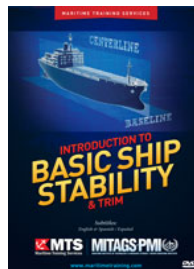

Subtitles: ENG, FRE, RUS, SPA, TAG
Item no: DVD0-49
Length: 11 minutes
Price: \$250.00

DVDs Produced by Maritime Training Services

**Immersion Suit Training: It Could Save Your Life!**

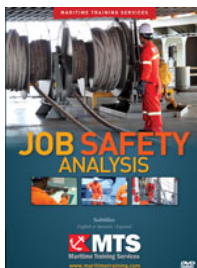

How fast would you be able to get into your immersion suit in a true emergency at sea? This video focuses on the importance of having shipboard immersion suits available for all personnel on your vessel. Learn essential skills such as the proper techniques for testing your suit, purging excess air from the suit, and safely entering the water.

Subtitles: CHI, ENG, RUS, SPA
Item no: DVD0-30
Length: 12 minutes
Price: \$200.00

**Introduction to Basic Ship Stability & Trim**

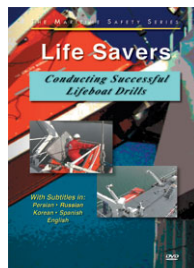

Although computers have made ship stability calculations easier, it's important to understand the core concepts behind stability. Using modern animations, this video builds your understanding of vessel stability by presenting relevant laws of physics, from the basics to more advanced principles. It was produced in cooperation with leading experts on this subject (William George, Peter Ohnstad, and PMI/MITAGS).

Subtitles: ENG
Item no: DVD0-52
Length: 19 minutes
Price: \$250.00

**Job Safety Analysis**

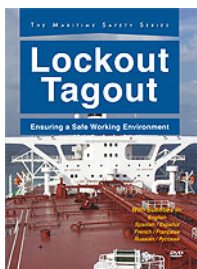

A job safety analysis (JSA) looks very different from one job site to another. However, all JSAs share three key components: identifying a job's steps, recognizing the potential dangers of each step, and determining how best to avoid those dangers. This video covers the entire JSA process and highlights what you need to know to make your job easier, safer, and more efficient.

Subtitles: ENG, SPA
Item no: DVD0-54
Length: 18 minutes
Price: \$250.00

**Life Savers: Conducting Successful Lifeboat Drills**

Ten percent of all maritime casualties occur during lifeboat drills. With proper training and the precise execution of lifeboat drills, you can make sure that your ship isn't part of this statistic. In this video, you'll see how knowing what to do during lifeboat operations significantly minimizes the chances of crew injuries, both during drills and in an actual emergency.

Subtitles: ENG, KOR, PER, RUS, SPA
Item no: DVD0-37
Length: 10 minutes
Price: \$200.00

**Lockout/Tagout: Ensuring a Safe Working Environment**

Hazardous energy on-board a maritime vessel can injure or kill ship personnel. This video, together with your company's lockout/tagout program, will help keep you and your crew safe by showing you how to isolate dangerous energy sources until your work is finished. You'll learn how to avoid serious accidents by familiarizing your crew with the safety procedures regarding hazardous energy.

Subtitles: ENG, FRE, RUS, SPA
Item no: DVD0-44
Length: 9 minutes
Price: \$250.00

**Making and Breaking Tow: Safe Operating Practices**

Making and breaking tow on a seagoing merchant vessel is a precise and dangerous operation that's performed in a constantly changing environment. Being at the wrong place at the wrong time can have instant and serious consequences. This video will help you and your crew build awareness, master the required skills, and minimize the risks that are inherent in tow jobs.

Subtitles: ENG, SPA
Item no: DVD0-56
Length: 17 minutes
Price: \$250.00

**Man Overboard! Procedures and Precautions**

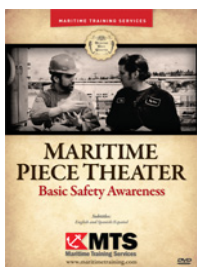

Going overboard while at sea is one of the greatest dangers in the maritime industry. This video focuses on identifying the best practices for preventing man-overboard (MOB) situations and knowing what to do when one of your shipmates ends up in the water accidentally. Included are 30 test questions approved by the U.S. Coast Guard and three MOB-related checklists.

Subtitles: CHI, ENG, RUS, SPA
Item no: DVD0-43
Length: 14 minutes
Price: \$250.00

**Maritime Labor Convention: Know Your Rights**

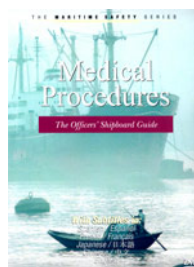

The Maritime Labor Convention (MLC) exists to protect seafarers from abuse, mistreatment, and unjust labor practices. In this video, 100 pages of MLC regulations have been condensed into a fast-paced, easy-to-understand summary of the basic concepts of the convention and how to comply with them. It covers everything from wage policies to the lengths of work shifts and rest periods.

Subtitles: CHI, ENG, FRE, PER, RUS, SPA
Item no: DVD0-48
Length: 14 minutes
Price: \$250.00

**Maritime Piece Theater: Basic Safety Awareness**

Inject some humor and a unique silent-film-era style into your shipboard training. This entertaining DVD presents six safety clips that address basic risk-management and personal protective equipment (PPE) issues in a fast-paced, fun-to-watch format. The series of three-minute videos depicting typical on-board situations will have special appeal for younger seafarers and ESL or multilingual crew members.

Subtitles: ENG, SPA
Item no: DVD0-50
Length: 19 minutes
Price: \$250.00

**Medical Procedures: The Officers' Shipboard Guide**

There's no question that having a ship's crew that's well trained in basic medical procedures saves lives. This video explains and illustrates the fundamentals of maritime medicine. It covers a broad range of knowledge and skills, from everyday practices to emergency procedures. The information is presented in three main sections: preparation, assessment, and treatment.

Subtitles: CHI, ENG, FRE, JAP, SPA
Item no: DVD0-09
Length: 53 minutes
Price: \$250.00

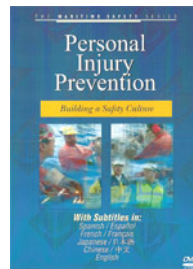

DVDs Produced by Maritime Training Services

Onboard Oil Pollution Response: Be Your Best, Prepare For The Worst

It's critical that you know how to help prevent oil spills and what steps you and your crew can take to minimize contamination in the event of a spill. In this video, you'll learn to prepare and conduct effective drills and to respond correctly to an actual spill. It also addresses compliance with applicable maritime industry standards, guidelines, and regulations.

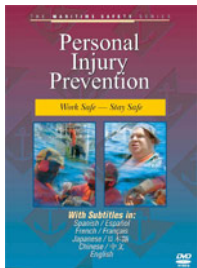

Subtitles: ENG, FRE, SPA
Item no: DVD0-05
Length: 16 minutes
Price: \$250.00

Personal Injury Prevention: Building a Safety Culture

Promoting a safe work environment on your ship prevents accidents and injuries and ultimately saves lives and money. This video features the insight and commentary of Richard Bracken, author of "Personal Injury Prevention: A Guide to Good Practice," with an emphasis on the STCW Convention and ISM Code. Learn the importance of a safety management system and good maritime housekeeping.

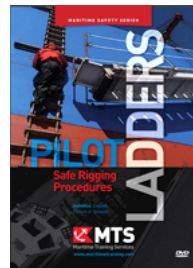

Subtitles: CHI, ENG, FRE, JAP, SPA
Item no: DVD0-06
Length: 18 minutes
Price: \$250.00

Personal Injury Prevention: Work Safe, Stay Safe

Don't let a lack of focus lead to crew injuries on your ship. This video will help you develop a shipboard environment in which safety is a constant priority. It features the insight and commentary of Richard Bracken, author of "Personal Injury Prevention: A Guide to Good Practice," and focuses on everyday practices that promote personal safety and injury prevention.

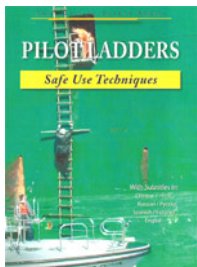

Subtitles: CHI, ENG, FRE, JAP, SPA
Item no: DVD0-07
Length: 15 minutes
Price: \$250.00

Pilot Ladders: Safe Rigging Procedures

Pilots come aboard ships to assist with navigation during particularly critical phases of voyages. It's imperative that crews do everything possible to ensure the safety of all personnel during pilot transfer operations, which always involve risk — even when conditions are favorable. In this video, your crew will learn the essentials of performing safe and efficient pilot transfers at sea.

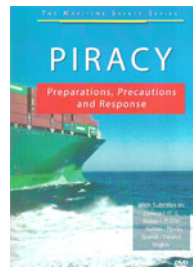

Subtitles: ENG, FRE, SPA
Item no: DVD0-33
Length: 10 minutes
Price: \$250.00

Pilot Ladders: Safe Use Techniques

Pilots come aboard ships to assist with navigation during particularly critical phases of voyages. It's imperative that crews do everything possible to ensure the safety of all personnel during pilot transfer operations, which always involve risk — even when conditions are favorable. In this video, your crew will learn the essentials of performing safe and efficient pilot transfers at sea.

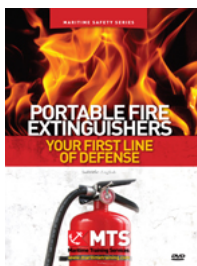

Subtitles: CHI, ENG, RUS, SPA
Item no: DVD0-34
Length: 7 minutes
Price: \$250.00

Piracy: Preparations, Precautions, and Response

In this time of increased pirate activity on the high seas, it is essential to know what can be done to deter such incidents. This video focuses on the threat of maritime piracy and the actions that a ship's crew should take to reduce the threat of pirate attacks and to respond appropriately in the event of such an attack.

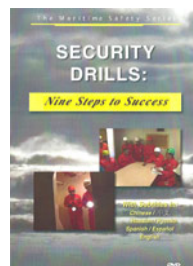

Subtitles: CHI, ENG, KOR, RUS, SPA
Item no: DVD0-35
Length: 11 minutes
Price: \$295.00

Portable Fire Extinguishers: Your First Line of Defense

Be ready to put out a fire on your ship at any time. In this video, you will learn how critical it is to understand the dangers of an on-board fire and how to combat it successfully. See demonstrations of the correct use of fire extinguishers, which are the most effective way to minimize crew injuries and ship damage.

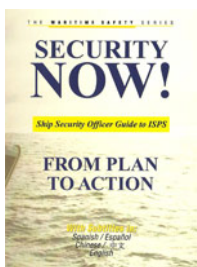

Subtitles: ENG
Item no: DVD0-32
Length: 11 minutes
Price: \$250.00

Security Drills: Nine Steps to Success

Security drills on ships are a necessary fact of life in the maritime industry. This video shows your Ship Security Officer (SSO) how to design and implement effective security drills. It presents the nine basic steps that must be included in any successful shipboard drill or exercise, and it provides several typical drill scenarios for your crew to observe.

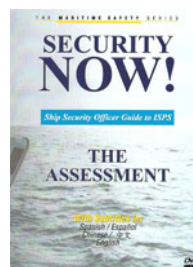

Subtitles: CHI, ENG, RUS, SPA
Item no: DVD0-31
Length: 32 minutes
Price: \$360.00

Security NOW! From Plan to Action

The security plan for your ship will be of little use unless you put it into action. This video shows you how to implement security strategies and practices on your vessel by following specific guidelines. Learn what the U.S. Coast Guard wants to see on-board your ship and what the new ISPS Code security levels mean for you and your crew.

Subtitles: CHI, ENG, SPA
Item no: DVD0-15
Length: 15 minutes
Price: \$200.00

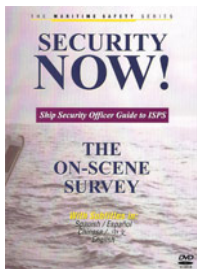

Security NOW! The Assessment

The first component or phase of shipboard security planning, as defined by the ISPS Code, is the security assessment. In this video, you'll learn what a security assessment is, how to develop one, and how to implement it. These tasks are typically the role of the Ship Security Officer (SSO) on each vessel, who has a number of on-board duties.

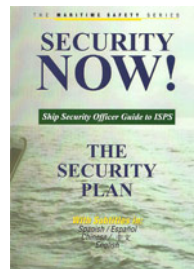

Subtitles: CHI, ENG, SPA
Item no: DVD0-12
Length: 10 minutes
Price: \$200.00

DVDs Produced by Maritime Training Services

**Security NOW! The On-Scene Survey**

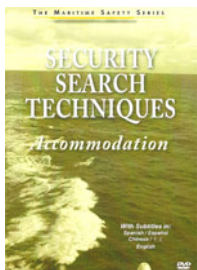

An attack on your ship while at sea could cost lives and money. In this video, you and your crew will learn to minimize the threat of attacks by performing an effective survey of your vessel. Identifying the strengths and vulnerabilities of your vessel will improve your ship's risk profile and help you stay one step ahead of would-be intruders.

Subtitles: CHI, ENG, SPA
Item no: DVD0-13
Length: 12 minutes
Price: \$200.00

**Security NOW! The Security Plan**

There's no higher priority for maritime vessels at sea than ship security and crew safety. This video demonstrates how shipboard security is all about managing the risks and mitigating the threats. Using what you learn in the DVD, you and your crew can make your ship as secure as possible by having a comprehensive and well-thought-out security plan.

Subtitles: CHI, ENG, SPA
Item no: DVD0-14
Length: 10 minutes
Price: \$200.00

**Security Search Techniques: Accommodation**

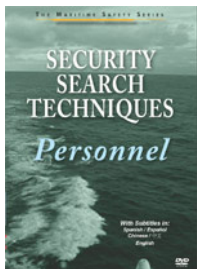

Contraband on a ship can be anything from merely undesirable items to potentially harmful or illegal items. Don't let contraband endanger your crew. This video shows how implementing access control and conducting berthing searches are key steps you can take to help protect crew members by reducing the chances of problematic items or substances making their way onto your vessel.

Subtitles: CHI, ENG, SPA
Item no: DVD0-21
Length: 10 minutes
Price: \$200.00

**Security Search Techniques: Baggage**

Minimize the chances of contraband ending up on your vessel by making thorough baggage searches a key part of your ship security plan. This video focuses on complying with ISPS Code and MARSEC guidelines while also emphasizing courtesy and respecting the rights of those who board your ship. You'll see how security searches make your crew and your vessel safer.

Subtitles: CHI, ENG, SPA
Item no: DVD0-22
Length: 12 minutes
Price: \$200.00

**Security Search Techniques: Personnel**

Searching everyone who boards your vessel at sea or in port is not easy, but doing so is an important and required component of ship and port security. This video demonstrates how the most effective way to accomplish this critical task is with a well-trained crew and a well-planned procedure that complies with the ISPS Code and MARSEC guidelines.

Subtitles: CHI, ENG, SPA
Item no: DVD0-23
Length: 10 minutes
Price: \$200.00

**Security Search Techniques: Ship's Stores**

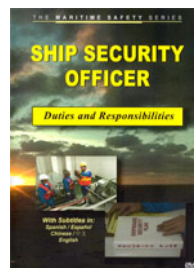

One of the most vulnerable aspects of your ship's security is the delivery of stores, or supplies, to the ship. Criminals and terrorists often try to exploit this vulnerability to either gain unauthorized access to a vessel or load contraband onto it undetected. This video focuses on the best methods of screening all incoming stores and detecting contraband in deliveries.

Subtitles: CHI, ENG, SPA
Item no: DVD0-24
Length: 12 minutes
Price: \$200.00

**Sexual Harassment Prevention**

Sexual harassment claims cost companies millions of dollars and create unsafe and stressful work environments. If your crew is thinking about a recent harassment incident, they're not focused on their jobs. In this video, you'll see that by conducting annual awareness trainings and implementing clear response procedures, you can build a safety culture and reduce potential liabilities on-board your ship.

Subtitles: ENG, FRE, SPA
Item no: DVD0-55
Length: 22 minutes
Price: \$250.00

**Ship Security Officer: Duties and Responsibilities**

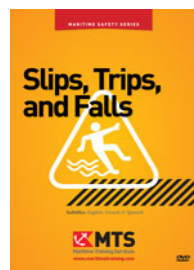

Without effective ship security, your vessel is constantly vulnerable to attack. In this video, you'll see how having a knowledgeable, qualified Ship Security Officer (SSO) on-board minimizes this danger. The SSO has many shipboard responsibilities, but the most important of those is identifying and responding to any and all threats that jeopardize the safety of the crew and the ship.

Subtitles: CHI, ENG, SPA
Item no: DVD0-17
Length: 14 minutes
Price: \$200.00

**Shipboard Familiarization: Know Your Duties, Know Your Ship**

Eighty percent of all accidents are caused by human error. This video presents a wealth of guidance that will help every mariner minimize this "human factor" on his or her vessel. Best practices, information on STCW requirements, and the importance of a thorough on-board orientation are just a few of the areas covered in this DVD.

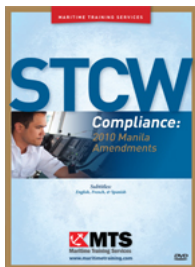

Subtitles: ENG, FRE, SPA
Item no: DVD0-04
Length: 14 minutes
Price: \$250.00

**Slips, Trips, and Falls**

Mariners at sea are particularly vulnerable to dangerous accidents such as slips, trips, and falls that can lead to serious injury and death. This video will give your crew a solid understanding of the potential hazards, an appreciation of the need for constant awareness of their surroundings, and a command of basic safety rules that can help prevent such accidents.

Subtitles: ENG, FRE, SPA
Item no: DVD0-60
Length: 15 minutes
Price: \$250.00

DVDs Produced by Maritime Training Services

**STCW Compliance: 2010 Manila Amendments**

Wondering what's new in STCW 2010? Curious about what's changed since the 1995 STCW Convention? Not sure what it's got to do with you? This video answers these and other questions about the latest STCW standards and compliance requirements for personnel aboard seagoing merchant ships.

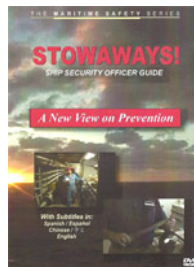

A bonus Instructor's Resource CD includes a guide and a text copy of the 2010 STCW Convention.

Subtitles: ENG, FRE, SPA

Item no: DVD0-03

Length: 28 minutes

Price: \$250.00

**Stowaways! A New View on Prevention**

The problem of stowaways on ships is as old as seafaring itself. This video draws on the expertise of seasoned mariners and industry experts to present practical, easy-to-understand approaches to preventing stowaway situations and also to dealing with them when they occur. This presentation is designed for use either by the Ship Security Officer (SSO) or for crew security training.

Subtitles: CHI, ENG, SPA

Item no: DVD0-20

Length: 12 minutes

Price: \$200.00

**U.S. Port State Control: Shipshape and Inspection Ready**

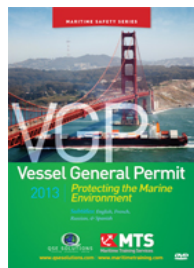

Whenever maritime vessels that are flying foreign flags enter U.S. waters, the officers and crew members should be fully aware of the U.S. Port State Control process. Watching this video will help prepare your vessel's personnel for inspections by the U.S. Coast Guard and immigration and agricultural officials. Produced with the assistance of U.S. Department of Homeland Security.

Subtitles: CHI, ENG, RUS, SPA

Item no: DVD0-02

Length: 24 minutes

Price: \$250.00

**Vessel General Permit 2013: Protecting the Marine Environment**

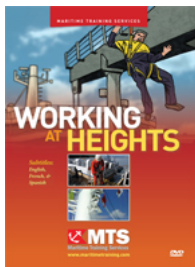

Before your vessel can leave port, it must be with current Vessel General Permit (VGP) requirements pertaining to protecting the marine environment. This video and the accompanying training book present clear and simple steps you can take to achieve this compliance. Integrate the inspection, monitoring, and reporting required by VGP into your best practices and existing safety management systems.

Subtitles: ENG, FRE, RUS, SPA

Item no: DVD0-38

Length: 15 minutes

Price: \$325.00

**Working at Heights**

On a working ship, even a fall from a low height can be very serious and potentially deadly. Hard metal surfaces and sharp equipment present seafarers with numerous hazards. In this video, your crew will learn the necessary preparations and procedures that will enable them to perform work at heights safely and respond appropriately in the event of an accident.

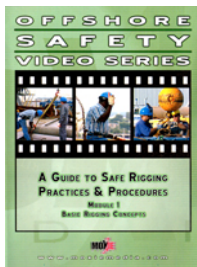

Subtitles: ENG, FRE, SPA

Item no: DVD0-58

Length: 15 minutes

Price: \$200.00

DVDs

A Guide to Safe Rigging Practices & Procedures: Basic Rigging Concepts

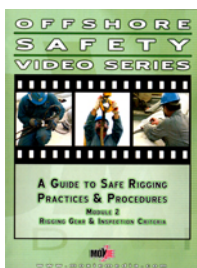

A great deal of this responsibility lies with the crane operator and the assisting riggers. It is their job to safely and efficiently utilize the lifting machinery and rigging gear available to them in order to support all ongoing operations. This program sets the stage for the good rigging by answering the most important job-related questions.

Item no: DVD1-60
Length: 27 minutes
Price: \$260.00

A Guide to Safe Rigging Practices & Procedures: Putting Slings to Work: Hitch, Capacity, & Hardware Selection

Current work rules and government regulations place full responsibility for proper rigging performance upon the Crane Operator and Rigger. It is the rigger's duty to be familiar with the condition and capability of all tools and equipment used.

Item no: DVD1-56
Length: 32 minutes
Price: \$260.00

A Guide to Safe Rigging Practices & Procedures: Rigging Gear & Inspection Criteria

All types of rigging gear and associated hardware and termination types are introduced and demonstrated in their appropriate uses.

Subtitles: ARA, FRE, POR, SPA
Item no: DVD1-105
Length: 22 minutes
Price: \$260.00

A Guide to Safe Rigging Practices and Procedures: Modules 1-5

The complete A Guide to Safe Rigging Practices & Procedures Series

Item no: DVD1-109
Price: \$685.00

A Seafarer's Guide to Energy Conservation & The Marine Environment

Learn about on board energy conservation, waste management, and what it means to be a responsible seafarer.

Subtitles: CHI, FRE, GRE, POR, RUS, SPA, TAG
Item no: DVD12-17
Length: 20 minutes
Price: \$325.00

Air Winch

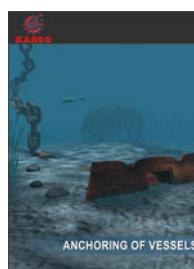

In the oil, construction, and maritime industries, material and personnel are frequently moved. When destinations are inaccessible by cranes or other movers, an Air Winch is an ideal choice. These powerful and versatile tools can pose serious hazards if careful procedures are not followed. Air Winch reviews basic OSHA and ASME codes and standards for safe winch operation.

Item no: DVD8-01
Length: 25 minutes
Price: \$300.00

Amazing Sea Vehicles: How Do They Do It?

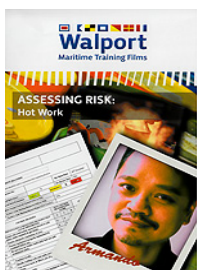

Learn how industrial plants manufacture the greatest sea vehicles, including hovercrafts, container ships, cruise liners, and submarines. Featuring segments from seasons 3 and 4 of the series, watch massive sea vehicles get designed and built.

Item no: DVD-560
Length: 48 minutes
Price: \$35.00

Anchoring of Vessels

Watch an anchor interact with sea beds in several conditions. Effective use of your anchor comes from understanding the mechanics of anchoring.

Item no: DVD5-03
Length: 32 minutes
Price: \$310.00

Assessing Risk: Hot Work

Risk assessments on hot work save lives. Using a case study of a deadly shipboard accident, this program shows how performing risk assessments during hot work jobs prevents potentially fatal situations. It also highlights the formal risk assessment process, specifically addressing hot work.

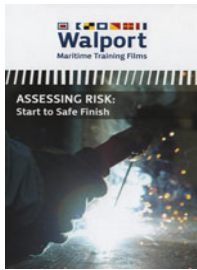

Subtitles: CHI, FRE, GRE, POR, RUS, SPA, TAG
Item no: DVD12-23
Length: 17 minutes
Price: \$325.00

Assessing Risk: Slips, Trips and Falls

Over 1 in 3 deaths among seafarers are due to slips, trips, and falls. That's too many casualties. This program discusses risk assessment with the aim of reducing the incidence of slips, trips, and falls. Included in this program is the use of actual incident report photographs to drive home this message: these easily avoidable accidents continue to occur and cost the maritime industry dearly - in time, money, and suffering.

Subtitles: FRE, GRE, POR, RUS, SPA, TAG
Item no: DVD12-20
Length: 17 minutes
Price: \$325.00

DVDs

**Assessing Risk: Start to Safe Finish**

Complacency kills. Carrying out routine safety procedures without recognizing potential risks is dangerous. Following risk assessment through from start to finish minimizes workplace injuries. This program wraps up the Assessing Risk series, brings together topics addressed in the first two programs, and drives home the importance of performing risk assessments before starting any workplace evolution.

Subtitles: CHI, ENG, FRE, GRE, POR, RUS, SPA, TAG
Item no: DVD12-24
Length: 10 minutes
Price: \$325.00

**Attack on the USS Cole**

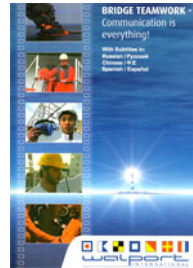

This intense documentary begins with the terrorist cell and finishes with the suicide bombing on the Cole. Hear the stories of heroism that saved the ship and crew from complete destruction.

Item no: DVD-521
Length: 48 minutes
Price: \$35.00

**Bilge Water Management**

See how an Oily Water Separator works and understand how to properly use the Oil Record Book. This 43-minute video has three sections: MARPOL Annex I Requirements for Handling Bilge Water, Specific Oily Water Separator Operating Instructions and How to Use the Oil Record Book for Bilge Water Management.

Item no: DVD5-18
Length: 43 minutes
Price: \$460.00

**Bridge Teamwork: Communication is Everything!**

This program explores the importance of working as a team on board ship, especially on the bridge where communication is vital. The film gives us an understanding of how an efficient bridge is run, with clear lines of communication between the master and his officers - all working as a team.

Subtitles: CHI, RUS, SPA
Item no: DVD12-14
Length: 14 minutes
Price: \$325.00

**Chapter 8 of Sire VIQ - Cargo & Ballast System - Petroleum Tankers (VOL 1 of 3)**

Vessel audit compliance procedures for cargo & ballast operations on board oil tankers.

Item no: DVD5-22
Length: 12 minutes
Price: \$260.00

**Chapter 8 of Sire VIQ - Cargo & Ballast System - Petroleum Tankers (VOL 2 of 3)**

Know what Vetting Inspectors are looking for and improve the safety of your ship. Using detailed 3D animations, this program covers vessel audit compliance procedures for cargo & ballast operations on board oil tankers, and is based on repetitive observations by Vetting Inspectors while auditing vessels as per Chapter 8 of the SIRE VIQ.

Item no: DVD5-24
Length: 13 minutes
Price: \$260.00

**Chapter 9 of VIQ - Mooring**

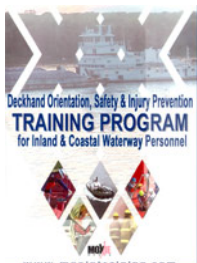

Don't let damaged mooring lines and improper procedure harm your crew and damage your ship. Improper mooring is one of the leading causes of personal injury in the maritime industry and is easily avoided.

Item no: DVD5-05
Length: 14 minutes
Price: \$210.00

**Confined Space Awareness**

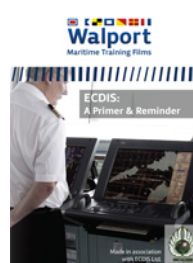

Confined spaces are some of the most hazardous areas in any workplace, and employees must be aware of all the hazards involved. Confined Space Awareness reviews the safe work practices, procedures, and equipment required to make a safe entry.

Item no: DVD8-09
Length: 8 minutes
Price: \$125.00

**Deckhand Orientation, Safety & Injury Prevention for Inland & Coastal Waterway Personnel**

Ideal for teaching new crew members the job requirements and safe work practices necessary for working in the towing industry. It is also invaluable as a training resource to reinforce safe work habits for existing employees. Delivered in multiple modules, each with their own learning objective, the program is well suited for on-board safety meeting use.

Item no: DVD1-21
Length: 60 minutes
Price: \$475.00

**ECDIS: A Primer & Reminder**

ECDIS is a major advancement in the way we navigate our ships, but it's a complex subject and one that is frequently not understood, leading to problems from wasted money to grounded vessels.

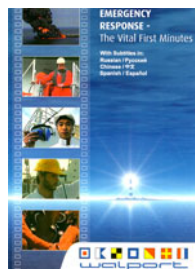

Subtitles: CHI, ENG, FRE, GRE, HIN, POR, RUS, SPA, TAG
Item no: DVD12-25
Price: \$255.00

DVDs

**Emergency Helicopter Abandonment**

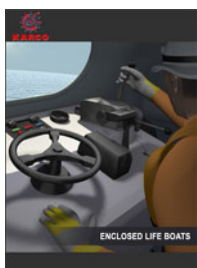

As the number of personnel flying over water increases, there is a greater risk of helicopter ditchings and the need for personnel to be trained in underwater escape methods.

Item no: DVD1-11
Length: 24 minutes
Price: \$360.00

**Emergency Response - The Vital First Minutes**

There are new rules, and many countries and organizations demand new levels of excellence from seafarers. This is especially true in a maritime emergency. What happens in those vital first few minutes can turn a problem into a disaster unless there is an emergency response plan.

Item no: DVD12-03
Length: 25 minutes
Price: \$325.00

**Enclosed Lifeboats: On Load Release Gear Systems**

Faulty lifeboat systems jeopardize your crew, leading to unnecessary and avoidable casualties. This program walks you step-by-step through the design of the release gear system and points out right and wrong operations and maintenance.

Item no: DVD5-01
Length: 9 minutes
Price: \$385.00

**Enclosed Space Entry: And One More Tragic Casualty**

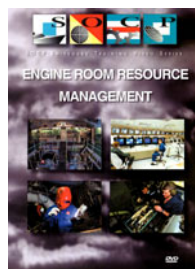

When tragedy strikes, confusion on how to respond can arise. This case study examines the numerous factors that led to a deadly enclosed space entry incident as well as the company's response in the ensuing months.

Item no: DVD5-19
Length: 22 minutes
Price: \$350.00

**Enclosed Space Entry: Perils and Precautions**

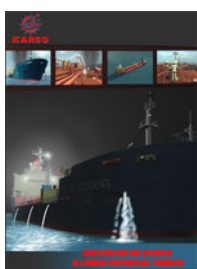

Enclosed spaces are the silent killer of the maritime industry. Knowing the hazards and precautions taken when working in these areas minimize personal injury to your crew through establishing a safe workspace. This program highlights entering enclosed spaces on board vessels and precautions taken to prevent incidents or accidents from occurring.

Item no: DVD5-08
Length: 29 minutes
Price: \$310.00

**Engine Room Resource Management**

Get the full potential from not only your ship, but also your crew. Human factors and the connection with STCW implementation are emphasized.

Item no: DVD2-09
Length: 14 minutes
Price: \$125.00

**Explosion On-board a Laden Chemical Tanker**

Explosions are a constant danger on board chemical tankers. Learn what steps to take to avoid a life threatening incident and to minimize damage caused by an explosion. This program is based on the true facts of an explosion on board an undisclosed chemical tanker.

Item no: DVD5-09
Length: 22 minutes
Price: \$350.00

**Extreme Engineering: Container Ships**

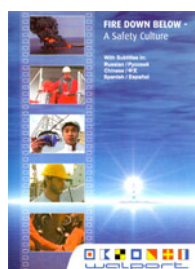

In this episode, Danish ship builders are attempting to turn the mass of steel beneath their torches into a monster container ship, a vessel that when completed, will blow the rudders off the worldwide cargo shipping industry.

Item no: DVD-550
Length: 48 minutes
Price: \$35.00

**Fatal Cost of Negligence and Non-Compliance**

Avoid fatal non-compliance accidents at sea by watching this highly detailed computer-generated recreation of a disaster. Learn which steps were ignored in the company's regulations. See what to enforce in your company's QSMS manuals to avoid these costly errors.

Item no: DVD5-17
Length: 31 minutes
Price: \$350.00

**Fire Down Below: A Safety Culture**

This drama touches on ISM and STCW themes, including the importance of a safety culture, correct record-keeping, maintenance procedures and the individual responsibility of everyone on board ship. The story opens with a dramatic fire that results in the death of a young cadet and follows a fire investigator as he analyzes the damage and interviews the crew.

Subtitles: CHI, RUS, SPA
Item no: DVD12-02
Length: 25 minutes
Price: \$325.00

DVDs

**Fire Safety & Firewatch**

Fire safety involves taking precautions to reduce the likelihood of a fire, and knowing how to react if one occurs. A Firewatch is trained to perform these duties and identify unsafe work conditions and fire prevention techniques to reduce potential dangers. Fire Safety & Firewatch presents an overview of fire prevention, extinguishing, and the major hazards associated with performing hot work.

Item no: DVD8-02
Length: 25 minutes
Price: \$300.00

**First Aid and Bloodborne Pathogens**

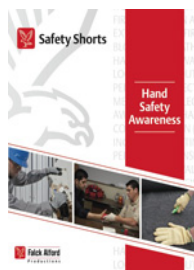

It is vital that employees know how to respond properly when an accident or injury occurs in the workplace. Exposure to bloodborne pathogens is a serious concern in responding to injury because these microorganisms can cause disease. Knowing the basic first aid and emergency action steps helps to minimize damage to life and property.

Item no: DVD8-15
Length: 7 minutes
Price: \$125.00

**Great Lakes Shipwrecks**

This program uses high definition television images, animation, and personal stories to explore Thunder Bay's underwater graveyard of hundreds of ships. Marine archaeologists, historians, and shipwreck survivors give first hand accounts about the many ships and crews that went down in these waters.

Item no: DVD-559
Length: 48 minutes
Price: \$35.00

**Hand Safety Awareness**

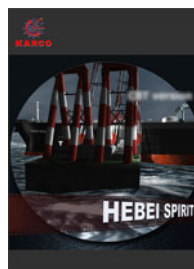

Your hands are your most used tools on the job, and are exposed to more hazards and potential injuries than any other part of the body. Preventing hand injuries begins with paying attention, as well as identifying and controlling hazards in the workplace.

Item no: DVD8-14
Length: 7 minutes
Price: \$125.00

**HAZCOM: Hazard Communication**

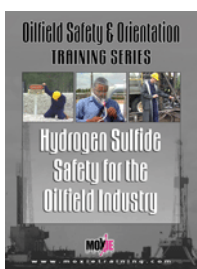

Employees must be able to identify hazardous chemicals in the workplace, as well as the precautions required to protect themselves. HAZCOM helps workers understand the hazards and safe work practices through the use of warning labels, signs, and material safety data sheets (MSDS).

Item no: DVD8-04
Length: 7 minutes
Price: \$125.00

**Hebei Spirit (Case Study)**

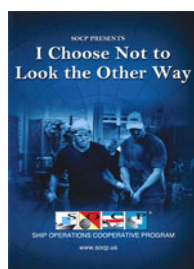

Educate your crew on the proper course of action during a potential collision and minimize the chance of it happening. This animated reenactment of the Hebei Spirit collision includes corrective actions that could have been taken to minimize damage and avoid the accident altogether.

Item no: DVD5-06
Length: 9 minutes
Price: \$110.00

**Hydrogen Sulfide (H2S) Safety for the Oilfield Industry**

Learn how to recognize when Hydrogen Sulfide is present in the work area and take necessary precautions to work with Hydrogen Sulfide safely.

Subtitles: SPA
Item no: DVD1-50
Length: 31 minutes
Price: \$375.00

**I Choose Not to Look the Other Way**

In this dramatic re-enactment a series of near misses, (working at heights, back strain, improper PPE, rushing to get a job done) all go unreported and contribute to a poor on board safety culture.

Item no: DVD2-12
Length: 15 minutes
Price: \$125.00

**Incident Reporting**

Incidents are unplanned, undesired events that adversely affect the completion of a task. Even when there are no injuries or property damage, it is the responsibility of all employees to report all incidents so they may be properly investigated and analyzed.

Item no: DVD8-11
Length: 6 minutes
Price: \$125.00

**Industrial Revelations: The European Story: Steam on the Water**

Ronald Top tells the story of how European engineers transformed the power of steam from pumping water from English mines into powering great ships.

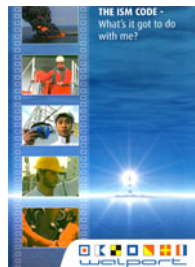

Item no: DVD-625
Length: 24 minutes
Price: \$35.00

DVDs

**International Safety Management Code**

Focusing on safety is a no-brainer: it saves time, money, and lives. Promote the development of safeguards through an emphasis on human element capabilities and training to harness advances in equipment and technology. Hear the unique lessons learned by other companies who have already gone through the ISM certification.

Item no: DVD2-01
Length: 19 minutes
Price: \$125.00

**ISM Code - What's It Got To Do With Me?**

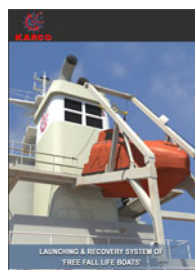

This program cuts through the small print of the ISM Code in a deliberately provocative way.

Subtitles: CHI, RUS, SPA
Item no: DVD12-04
Length: 25 minutes
Price: \$325.00

**ISPS Code**

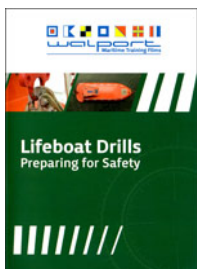

In an era of increased security threats, having an effective security team is vital. An essential element to a successful team is knowing preventative measures, done through proper training. This program deals with the implementation of the ISPS Code for ships in port and at sea. It also addresses assisting port authorities in case of a security threat.

Item no: DVD5-04
Length: 24 minutes
Price: \$260.00

**Launching and Recovery System of 'Free Fall Life Boats'**

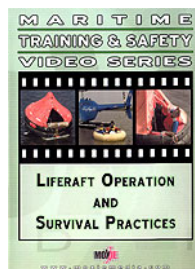

The worst time to realize you know too little about a lifeboat is when you enter one. Minimize your risk of injury by learning how the launching and retrieval systems operate. This program focuses on various aspects relating to the release gear system and recovery procedures for free fall life boats.

Item no: DVD5-15
Length: 8 minutes
Price: \$385.00

**Lifeboat Drills: Preparing for Safety**

Input from industry experts and case studies illustrate what can go wrong while participating in a lifeboat drill. Learn preventative measures and best practices.

Subtitles: CHI, FRE, GRE, POR, RUS, SPA, TAG
Item no: DVD12-18
Length: 20 minutes
Price: \$325.00

**Liferaft Operation and Survival Practices**

Abandoning ship is not the be all, end all. Liferaft training is an essential element to personal survival and is required by SOLAS. In the event of having to use a liferaft this training will most likely save your life.

Item no: DVD1-03
Length: 30 minutes
Price: \$360.00

**Line Handling: Safe Working Environments & Procedures**

Improper line handling can lead to severe injuries or even death. A ship's second officer was killed when he was caught by a line and pulled into a winch drum and an Able Bodied Seaman was seriously injured when his knee was crushed against a bitt due to a jammed line on the capstan.

Item no: DVD2-13
Length: 45 minutes
Price: \$250.00

**Maritime Benzene Awareness**

Learn the hazards and the preventative measures required when transferring, transporting or storing Benzene cargoes. This training fulfills the requirements of the American Waterways Operators Responsible Carriers (RCP) (RCP V-C-1f-2) and the USCG 46 CFR 197.565 (b).

Item no: DVD1-42
Length: 13 minutes
Price: \$385.00

**Maritime Medical Emergencies: A Shock to the Heart**

This program depicts resuscitation of a crew member with a single shock of an AED, administering oxygen, starting an IV, administering intravenous medication, use of a pulse Oximeter, applying a cervical collar, moving a crew member with possible neck injuries, monitoring vital signs, consulting with a physician, and packaging the crew member for helicopter evacuation.

Item no: DVD4-01
Length: 16 minutes
Price: \$99.95

**Maritime Medical Emergencies: An Elephant on the Chest**

This program depicts treatment of a crew member suffering from chest pain in a documentary-style reenactment. It steps through the correct actions on board medical personnel should take.

Item no: DVD4-04
Length: 10 minutes
Price: \$99.95

DVDs

Maritime Medical Emergencies**Maritime Medical Emergencies: Be Prepared**

This program depicts treatment of a crew member who has suffered a seizure; depicting procedures including primary and secondary physical examinations, stabilization of the spine by means of a cervical collar, administration of oxygen, and consulting with a physician.

Item no: DVD4-08
Length: 8 minutes
Price: \$99.95

Maritime Medical Emergencies**Maritime Medical Emergencies: Cooking Up Trouble**

This program depicts treatment of a crew member who has suffered second degree burns in a documentary-style reenactment. It steps through the correct actions on board medical personnel should take.

Item no: DVD4-05
Length: 12 minutes
Price: \$99.95

Maritime Medical Emergencies**Maritime Medical Emergencies: Don't Be a Fall Guy**

This program depicts treatment of a crew member who has suffered trauma, including an exposed fracture of the leg, during a fall. It shows splinting multiple fractures, applying a cervical collar, moving a seriously injured crew member, making primary and secondary injury assessments, dressing the exposed fracture, monitoring vital signs, administering narcotic pain medication, consulting with a physician, and packaging the crew member for transport.

Item no: DVD4-03
Length: 13 minutes
Price: \$99.95

Maritime Medical Emergencies**Maritime Medical Emergencies: Don't Get Choked Up**

This program depicts treatment of a crew member suffering from complete blockage of the trachea. Watch someone perform the Heimlich Maneuver, learn how to administer oxygen, use a blood pressure cuff and pulse oximeter.

Item no: DVD4-09
Length: 5 minutes
Price: \$99.95

Maritime Medical Emergencies**Maritime Medical Emergencies: Green with Envy**

This program depicts treatment of a crew member suffering from sea sickness in a documentary-style reenactment. It steps through the correct actions on board medical personnel should take.

Item no: DVD4-10
Length: 11 minutes
Price: \$99.95

Maritime Medical Emergencies**Maritime Medical Emergencies: One Hand for the Ship**

The program depicts treatment procedures including assessment of an injured crew member's ABC's, stabilization of the immediate threats to his life and limb, dressing the wound, packaging the amputated part for transport, administration of morphine, starting an IV and administering an intravenous antibiotic, and consulting with a physician.

Item no: DVD4-06
Length: 9 minutes
Price: \$99.95

Maritime Medical Emergencies**Maritime Medical Emergencies: The Eyes Have It**

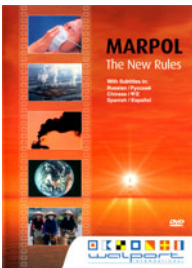

This program depicts treatment of a crew member whose eyes have been contaminated with a caustic substance. The program demonstrates irrigation of a crew member's eyes, administering anesthetic eye drops, testing a crew member's vision, performing a fluorescent dye test to check for corneal abrasions or ulcerations, applying antibiotic ointment to the eyes, and patching an injured eye.

Item no: DVD4-02
Length: 9 minutes
Price: \$99.95

Maritime Medical Emergencies**Maritime Medical Emergencies: Use Your Head**

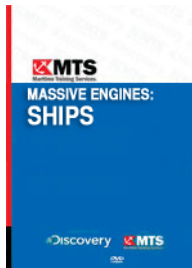

This program depicts treatment of a crew member who has been struck in the head by a falling tool. It shows treatment procedures including primary, secondary, and follow-up physical examinations, stabilization of a crew member's spine by means of a cervical collar, transfer to the ship's hospital using a litter, treatment of a head wound and nose bleed, and consulting with a physician.

Item no: DVD4-07
Length: 12 minutes
Price: \$99.95

**MARPOL: The New Rules**

Keep yourself out of trouble and do your part to protect the Earth. Noncompliance with MARPOL can lead to heavy fines and even jail time. This program discusses four areas in which ships affect the environment (fuel, engines, gas, and incineration) as well as the requirements enforced by MARPOL to limit these effects.

Subtitles: CHI, RUS, SPA
Item no: DVD12-13
Length: 20 minutes
Price: \$325.00

**Massive Engines: Ships**

Chris Barrie examines the development of marine engines, from the first crude steam ships to the huge diesel engines found on modern container ships.

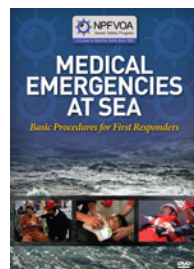

Item no: DVD-564
Length: 24 minutes
Price: \$35.00

DVDs

**Mayday! The Bering Sea**

In March 2008, the fishing ship Alaska Ranger steamed out of Dutch Harbor, Alaska on a 12-day winter fishing mission. Just 120 miles into the Bering Sea in pitch darkness, the ship suddenly went down leaving 47 fishermen fighting for their lives in the frigid water and 20-foot waves. The rescue that unfolded over the next 14 hours would become the largest and most daring maritime rescue in U.S. history. This is the dramatic story in the words of those who survived, and the heroic account of those who did not.

Item no: DVD-568
Length: 48 minutes
Price: \$35.00

**Medical Emergencies at Sea**

Learn how to evaluate an emergency scene, how and when to offer basic first aid, and how to communicate with shore-based services and expertise.

Item no: DVD10-02
Length: 37 minutes
Price: \$280.00

**Mighty Ships: Emma Maersk**

As the Emma Maersk sets out on a two week journey from the Far East to Western Europe, the ship and her crew will encounter rough seas, bad weather, a transit of the Suez Canal and the threat of a pirate attack, as they work to keep to a rigid schedule.

Item no: DVD-573
Length: 48 minutes
Price: \$35.00

**Mighty Ships: M/V BeCrux**

The crew of the BeCrux has a difficult double-duty, both to the ship and to its living cargo. They must safely load livestock aboard the ship and into individual pens. They must plot a course that avoids and rough seas. Most importantly, they have to feed and water the beasts, and clean the waste the animals produce. These nautical cowboys will monitor the animals as the climate changes and work to maintain a level of comfort for their "passengers" unlike any other vessel on the seas.

Item no: DVD-572
Length: 48 minutes
Price: \$35.00

**Mighty Ships: M/V Faust**

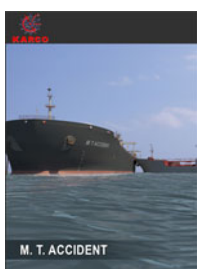

Mighty Ships sails along on Wallenius Wilhelmsen's M/V Faust, the largest car carrier in the world, as it takes a shipload of cars, ranging from Mini Coopers to Jaguars, Land and Range Rovers as well as Rolls Royce, across the notoriously rough seas of the North Atlantic.

Item no: DVD-574
Length: 48 minutes
Price: \$35.00

**Mooring Operations: One Small Slip**

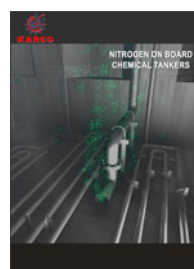

Mooring is a dangerous line of work in which hundreds of lives have been lost due to improper work practices performed by experienced and inexperienced workers. Understand the importance of preparation, teamwork, control, and correct use of PPE and learn the role that weather, maintenance, and complacency can play.

Subtitles: CHI, FRE, GRE, POR, RUS, TAG
Item no: DVD12-19
Length: 14 minutes
Price: \$325.00

**MT Accident (Case Study)**

Learn from others' accidents. Watch an accurate reenactment of a collision involving an undisclosed VLCC tanker. Initially issued to other ships in its fleet as a training tool on avoiding future collisions, this program has recently become available to the public.

Item no: DVD5-10
Length: 33 minutes
Price: \$350.00

**Nitrogen On Board Chemical Tankers**

Knowing the hazards of Nitrogen and its proper uses saves lives. Make yourself aware of the relationship between Nitrogen and your ship to avoid personal injury and ship damage.

Item no: DVD5-14
Length: 25 minutes
Price: \$260.00

**NORM: Awareness**

Naturally Occurring Radioactive Material (NORM) includes all radioactive elements found organically in the environment, which exist in low levels all around us. However, the extraction and production of oil, natural gas, or minerals may cause these materials to accumulate in the hazardous concentrations. NORM: Awareness reviews the hazards and proper safety procedures associated with NORM.

Item no: DVD8-10
Length: 26 minutes
Price: \$300.00

**NORM: Survey**

NORM surveys are an essential part of radiation protection programs. Surveys are conducted when facilities or equipment have known or suspected contamination. NORM: Survey reviews the basic policies, procedures, and equipment necessary to detect the presence and magnitude of NORM contamination.

Item no: DVD8-16
Length: 11 minutes
Price: \$250.00

DVDs

**Ocean of Fear**

Centered on the sinking of the USS Indianapolis, which was torpedoed by a Japanese submarine on July 30, 1945 in the Philippine Sea. Of the estimated 900 men who survived the attack, only 317 were rescued after four days in shark infested waters.

Item no: DVD-579
Length: 48 minutes
Price: \$35.00

**Onboard Basic Safety Training Program: Basic Fire Fighting**

To prevent this catastrophic emergency, every seaman is trained in Basic Fire Fighting. Each is expected to pay constant attention to fire prevention, and to be capable of serving as an effective member of a fire response team. Comprehensive program includes workbook and strong visuals for teaching this vital core competency.

Item no: DVD4-23
Length: 47 minutes
Price: \$295.00

**Onboard Basic Safety Training Program: Onboard First Aid: Immediate Actions**

Based on actual incidents drawn from Maritime Health Services, a professional medical consultant firm that has responded to more than 15,000 incidents. Photographed aboard deep-sea vessels ranging from tugs and fishing vessels to container ships and tankers, these videos demonstrate professionally executed emergency medical techniques and procedures in documentary fashion, with a minimum of theory.

Item no: DVD4-22
Length: 43 minutes
Price: \$295.00

**Onboard Basic Safety Training Program: Personal Safety & Social Responsibility**

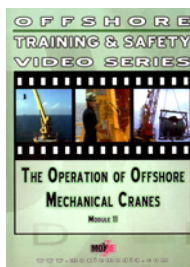

This ideal teaching aid illustrates safe working practices, effective human relationships, fundamentals of communication and chain of command, emergency procedures, and pollution prevention. Combining dramatized, image-rich scenarios with a corresponding full-color workbook and a comprehensive audio-visual test, this program teaches mariners to pay close attention to personal safety in a world of potential hazards.

Item no: DVD4-25
Length: 35 minutes
Price: \$295.00

**Onboard Basic Safety Training Program: Personal Survival**

Even the best ships can capsize or sink with terrifying speed, and personal survival equipment is only as good as the men and women who operate it. This program, based on requirements in Table VI of the STCW Code, offers training, testing, and assessment features that facilitate compliance with the International Safety Management (ISM) and STCW Codes and includes a workbook.

Item no: DVD4-24
Length: 55 minutes
Price: \$295.00

**Operation of Offshore Mechanical Cranes**

There is a high level of risk involved with crane operation. Having a well-trained crane operator is essential to your crew's safety. This refresher course in proper operational procedures as recommended by API RP 2D.

Item no: DVD1-86
Length: 20 minutes
Price: \$335.00

**Personnel Transfer**

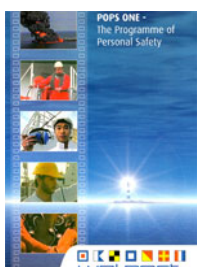

Personnel transfers are a daily occurrence in offshore environments, but each method presents potentially serious hazards. Personnel Transfer reviews the proper procedures to follow for each transfer method, as well as how to respond in the event of an offshore emergency or evacuation.

Item no: DVD8-06
Length: 8 minutes
Price: \$125.00

**POPS - The Programme of Personal Safety**

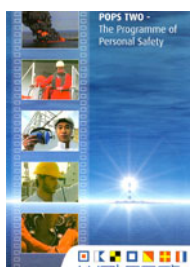

This series contains short safety clips with no dialogue, making them easily understood by all nationalities on a ship.

Item no: DVD12-POPS
Price: \$1000.00

**POPS 1**

This program contains several clips covering issues including mooring dangers, security, back injury, and drug abuse. The POPS series contains shorts with no dialog, making them easily understandable by all nationalities on your vessel.

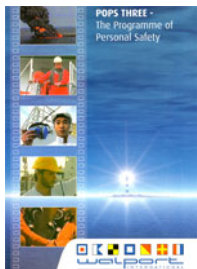

Item no: DVD12-05
Length: 60 minutes
Price: \$325.00

**POPS 2**

This program contains 10 safety clips including Oil Spill - Everyone's Nightmare to Fire - Not Wanted On Board. The POPS series contains shorts with no dialog, making them easily understandable by all nationalities on your vessel.

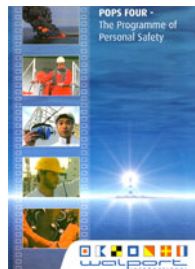

Item no: DVD12-06
Length: 27 minutes
Price: \$325.00

DVDs

**POPS 3**

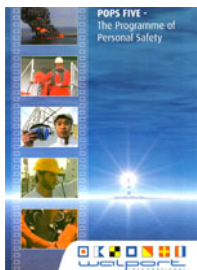

This program includes several safety clips ranging from Basic First Aid to Wear the Right Gear. The POPS series contains video shorts with no dialog, making them easily understandable by all nationalities on your vessel.

Item no: DVD12-07
Length: 27 minutes
Price: \$325.00

**POPS 4**

This program continues the unique concept of short, memorable safety clips, from Fire - Don't Have One to Work as a Team. The POPS series contains no dialog, making them easily understandable by all nationalities on your vessel.

Item no: DVD12-08
Length: 20 minutes
Price: \$325.00

**POPS 5**

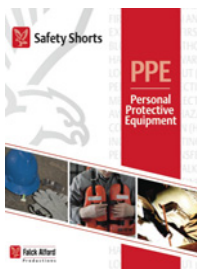

This is the latest in the series, and includes Don't Let a Terrorist on Your Ship. The POPS series contains no dialog, making them easily understandable by all nationalities on your vessel.

Item no: DVD12-09
Length: 20 minutes
Price: \$325.00

**Portable Gas Detection Equipment Calibration Procedures**

Defective gas detection equipment cause unnecessary casualties in the workplace. Ensuring your crew's well being requires knowing whether a space is safe to enter, accomplished in part by performing proper calibration procedures.

Item no: DVD5-07
Length: 9 minutes
Price: \$110.00

**PPE**

Personal protective equipment, or PPE, is any barrier worn to reduce exposure to hazards or injuries. Selecting the appropriate PPE for a job, wearing PPE correctly, and properly maintaining PPE are vital to keeping employees safe from workplace hazards.

Item no: DVD8-13
Length: 7 minutes
Price: \$125.00

**Raging Planet: Sea Storms**

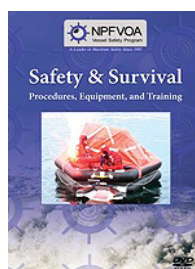

Every trip on the Earth's oceans is a potential battle with nature. Witness the awesome forces that can punch a giant hole in a supertanker, capsize any size ship, and leave you fighting for your life on the open seas, thousands of miles from help.

Item no: DVD-589
Length: 48 minutes
Price: \$35.00

**Respiratory Protection**

When the potential for exposure to atmospheric hazards exists, employees must be protected. Respiratory Protection helps employees understand the safety procedures, hazard controls, and PPE that protects them in dangerous atmospheres.

Item no: DVD8-08
Length: 6 minutes
Price: \$125.00

**Safety and Survival: Procedures, Equipment, and Training**

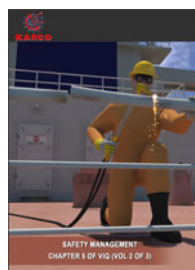

Shivering in the frigid waters of the North Pacific is not the time to realize that your safety and survival training is insufficient. Essential survival techniques are explored by modern emergency teams. USCG rescue helicopter pilots, lost-ship survivors, and commercial fishermen discuss vital survival techniques. This program, presented by NPFVOA, is a crucial component of any vessel's safety program.

Item no: DVD10-01
Length: 62 minutes
Price: \$280.00

**Safety Management: Chapter 5 of VIQ (Vol. 1 of 3)**

Know what the inspectors are looking for. Focusing your energies on what inspectors look for is an effective way to get high marks on inspections and improve the safety of your ship. This program focuses on the standard repetitive observations by vetting inspectors while auditing vessels as per Chapter 5 of the Vessel Inspection Questionnaire through the use of 3D animation.

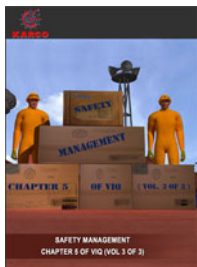

Item no: DVD5-11
Length: 18 minutes
Price: \$210.00

**Safety Management: Chapter 5 of VIQ (Vol. 2 of 3)**

Know what the inspectors are looking for. Focusing your energies on what inspectors look for is an effective way to get high marks on inspections and improve the safety of your ship. This program focuses on the standard repetitive observations by vetting inspectors while auditing vessels as per Chapter 5 of the Vessel Inspection Questionnaire through the use of 3D animation.

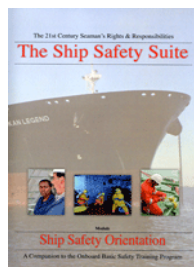

Item no: DVD5-12
Length: 16 minutes
Price: \$210.00

DVDs

**Safety Management: Chapter 5 of VIQ (Vol. 3 of 3)**

Know what the inspectors are looking for. Focusing your energies on what inspectors look for is an effective way to get high marks on inspections and improve the safety of your ship. This program focuses on the standard repetitive observations by vetting inspectors while auditing vessels as per Chapter 5 of the Vessel Inspection Questionnaire through the use of 3D animation.

Item no: DVD5-13
Length: 11 minutes
Price: \$160.00

**Ship Safety Orientation**

This program begins with a discussion of the goal of modern vessel operations: to serve the shipping marketplace by providing marine operations that cause no accidents, no injuries to personnel, and no environmental damage.

Item no: DVD4-31
Length: 20 minutes
Price: \$200.00

**Shipboard Accident Investigation**

This program is intended to be used as a training aid to assist accident investigation teams in conducting investigations. It is also intended to make all crew members aware of the importance of reporting accidents and near accidents.

Item no: DVD2-05
Length: 15 minutes
Price: \$125.00

**Shipboard Energy Efficiency Management Plan (SEEMP)**

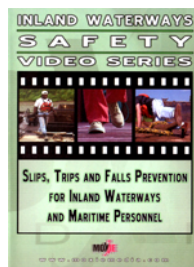

Beginning January 2013, the IMO adopted amendments to MARPOL that made Shipboard Energy Efficiency Management Plans (SEEMP) applicable for all vessels above 400 gross tons. This video introduces key elements of SEEMP, and demonstrates activities that lead to fuel savings.

Item no: DVD5-20
Length: 14 minutes
Price: \$260.00

**Shipboard Security Awareness**

This video program features security professionals with maritime backgrounds such as the Global Maritime Transportation school at the U.S. Merchant Marine Academy, and other industry professionals, which should help to instill a high level of security awareness among crew members and will provide practical real-world advice to crews on the security of their ships.

Item no: DVD2-10
Length: 24 minutes
Price: \$225.00

**Slip, Trip and Fall Prevention for Inland Waterways and Maritime Personnel**

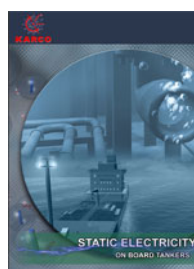

Provides instruction on how to prevent injuries and fatalities from the leading cause of accidents in all industries: slips, trips, and falls.

Item no: DVD1-92
Length: 13 minutes
Price: \$410.00

**Somali Pirate Takedown: The Real Story**

The real story behind the Somali Pirate capture of the Maersk Alabama, and the kill shots that saved the life of Captain Richard Phillips.

Item no: DVD-596
Length: 48 minutes
Price: \$35.00

**Static Electricity On Board Tankers**

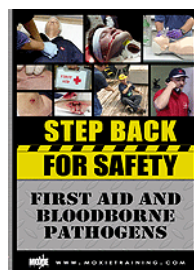

Watch how static electricity can cause a catastrophic explosion on a tanker. Prevent this from happening on your vessel by learning what causes static electricity and the proper ways to minimize it.

Item no: DVD5-02
Length: 16 minutes
Price: \$260.00

**Step Back for Safety: Electrical Safety**

Electricity is essential to modern life and it powers the workplace, but it also presents life-threatening hazards. This program focuses on methods for safe work and injury prevention that include careful inspection of electrical components, removal of broken equipment from service including frayed cords, being sure to ground equipment using Ground Fault Circuit Interrupters, avoiding power lines and stormy weather, and using PPE.

Item no: DVD1-44
Length: 11 minutes
Price: \$325.00

**Step Back for Safety: First Aid and Bloodborne Pathogens**

Builds awareness of how to respond to common workplace injuries and medical conditions. A focus on bloodborne pathogens explains how to prevent serious diseases from infecting your work force, or spreading among workers.

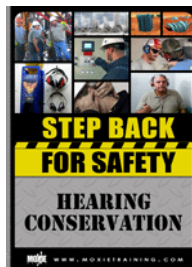

Item no: DVD1-46
Length: 9 minutes
Price: \$325.00

DVDs

Step Back for Safety: Hazard Communication (HAZCOM)

Working with hazardous chemicals is a dangerous task with fatal consequences. Understand how to use information found on warning labels and in Material Safety Data Sheets to handle and store chemicals using PPE, and how to respond to leaks, spills or other accidents.

Item no: DVD1-52
Length: 11 minutes
Price: \$325.00

Step Back for Safety: Hearing Conservation

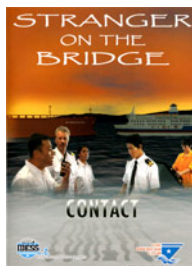

When a worker loses hearing due to noise in the workplace, it is gone forever. Learn essential steps to prevent hearing loss.

Item no: DVD1-48
Length: 7 minutes
Price: \$325.00

Step Back for Safety: Housekeeping

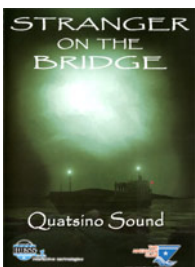

Clean up your room! Learn basic housekeeping skills and how to keep yourself safe while making your surroundings a little more pleasant.

Item no: DVD1-49
Length: 9 minutes
Price: \$325.00

Stranger on the Bridge: Contact

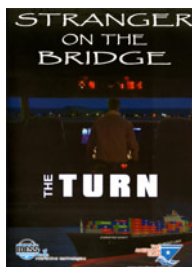

There is no substitute for the Mark I eyeball. However, using your navigational instrumentation alone is not enough to guarantee safe navigation. This case study includes a reenactment and analysis of an incident in which poor communications on the bridge and a lack of attentiveness lead to a collision between a tanker and a car ferry.

Subtitles: CHI, RUS
Item no: DVD11-09
Length: 23 minutes
Price: \$350.00

Stranger on the Bridge: Quatsino Sound

Grounding a vessel is not only embarrassing, it can cost you your job. This case study includes a reenactment of an actual incident of grounding, along with an analysis that walks you through specific elements that affected the incident. In this incident the pairing of a hasty pilot and an inexperienced master leads to a devastating accident.

Subtitles: CHI, RUS
Item no: DVD11-08
Length: 24 minutes
Price: \$350.00

Stranger on the Bridge: The Turn

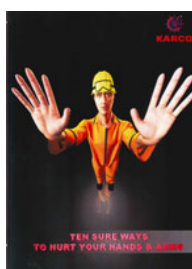

We've all heard that loose lips sink ships, but on the bridge sealed lips can, as well. This case study includes a reenactment and analysis of an incident in which poor communications on the bridge and errors in navigation lead to the grounding of a vessel.

Subtitles: CHI, RUS
Item no: DVD11-10
Length: 19 minutes
Price: \$350.00

Take 5: Five Ways to Stay Safe

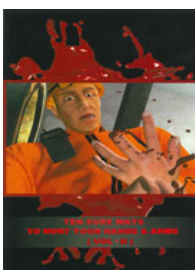

It sounds like pure common sense... because it IS pure common sense. Take 5 makes it real by identifying for the crew member what could go wrong and how these 5 steps can help avoid the accident. The audience sees how hazards like leaking oil, an unsecured ladder, or an electric shock can all be avoided by engaging the brain before the hands.

Subtitles: CHI, RUS, SPA
Item no: DVD12-11
Length: 10 minutes
Price: \$190.00

Ten Sure Ways to Hurt Your Hands & Arms

See ten gruesome hand and finger injuries and learn what precautionary measures could have prevented the accidents. These graphic images provide visual consequences that remind your crew about the importance of basic safety when performing everyday jobs.

Item no: DVD5-21
Length: 13 minutes
Price: \$260.00

Ten Sure Ways To Hurt Your Hands & Arms (Vol-II)

See ten new gruesome finger, hand and arm injuries and learn what precautionary measures could have prevented the accidents. Graphic animations provide visual consequences that remind your crew about the importance of basic safety when performing everyday jobs.

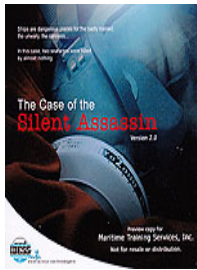

Item no: DVD5-23
Length: 16 minutes
Price: \$260.00

The Case of the Invisible Assassin

A compelling case study of a fatal enclosed space entry accident on board a bulk carrier in the Gulf of Thailand. Includes both re-enactment and analysis chapters. Teach your crew what steps would have prevented the loss of life. Learn why risk assessment is so vital to realizing the dangers involved in enclosed space entry. Follow the rules - learn the safe entry procedures

Item no: DVD11-12
Length: 26 minutes
Price: \$350.00

DVDs

**The Case of the Silent Assassin**

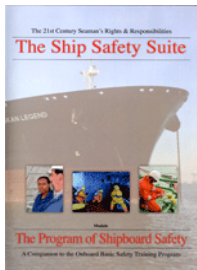

A compelling case study of a fatal enclosed space entry on board a tanker in the Mediterranean. Learn which procedures ignored by crew and officers resulted in the death of two crew members.

Item no: DVD11-11
Length: 25 minutes
Price: \$350.00

**The Human Element**

Based on the award-winning book of the same name, this film uses a dramatic story to show how a series of minor oversights and misjudgments by different crew members can work together to create a major incident at sea.

Subtitles: CAN, ENG, FRE, GRE, HIN, POR, POR, RUS, SPA, TAG
Item no: DVD12-26
Length: 34 minutes
Price: \$535.00

**The Program for Shipboard Safety**

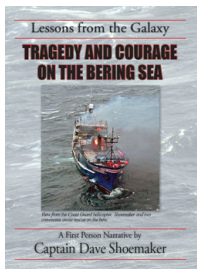

The program describes the importance of a safety culture extending from top management through the ranks of on board personnel. It discusses the importance of ship familiarization training for new crew members and covers maritime security, the HSSE (health, safety, security and environmental) management system, and an introduction to shipboard environmental management.

Item no: DVD4-35
Length: 20 minutes
Price: \$200.00

**Think! FIRST**

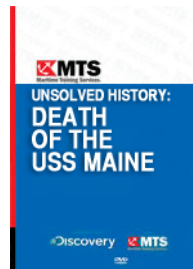

This program contains twelve short training films, intended for delivery as either a single presentation, or as twelve standalone training films. It is a major contribution toward the creation of a "Safety Culture" on board any vessel.

Item no: DVD12-21
Length: 20 minutes
Price: \$325.00

**Tragedy and Courage on the Bering Sea (Case Study)**

This program will make your crew sit up and take notice. The message is as simple as it is imperative: a crisis at sea can happen to you. Safety training is a critical component of vessel operation that everyone on board must take seriously. Hearing it from the mouth of a veteran sea captain who acknowledges that he once shared the attitude that his own toughness and experience made him immune from catastrophe only makes it more powerful.

Item no: DVD4-33
Length: 70 minutes
Price: \$295.00

**Unsolved History: Death of the USS Maine**

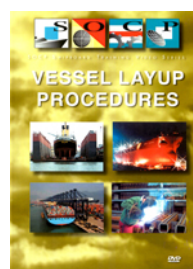

Wreckage photos and animation help engineers perform a forensic autopsy of the U.S.S. Maine. This examination should explain the explosion that coined the phrase "Remember the Maine! To Hell with Spain" and started the Spanish-American War.

Item no: DVD-619
Length: 48 minutes
Price: \$35.00

**Unsolved History: World's Deadliest Sea Disaster**

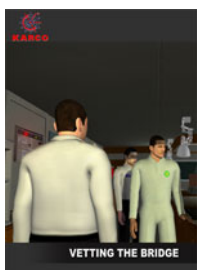

The sinking of Wilhelm Gustloff was the worst maritime disaster in history. Sunk by a Soviet submarine on 30 January 1945, the death toll on the Wilhelm Gustloff was equivalent to nearly six Titanics.

Item no: DVD-620
Length: 48 minutes
Price: \$35.00

**Vessel Layup Procedures**

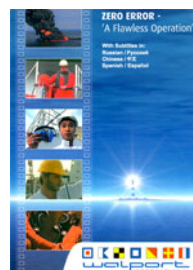

Prevent unnecessary damage to your vessel by following essential procedures to prepare it for a safe and incident free, long-term layup. These methods and procedures are based on those used by BP Oil Shipping Company.

Item no: DVD2-04
Length: 25 minutes
Price: \$125.00

**Vetting the Bridge**

Fully utilize your ship; familiarize yourself with the ship's bridge. Knowing what inspectors look for leads to better performance during operations and better marks on inspections. This program highlights common observations by vetting inspectors when auditing the navigational requirements as per Chapter 4 of the Vessel Inspection Questionnaire. It is also intended to show the correct procedures to follow with respect to the commonly identified deficiencies.

Item no: DVD5-16
Length: 14 minutes
Price: \$210.00

**Zero Error - A Flawless Operation**

Accidents will happen, but you can minimize their occurrence by aiming for 100% safety. Zero Error encourages everyone to take responsibility for proactive safety thinking and planning, using a simple but effective system of "safety sampling" that encourages and produces an environment where error is not tolerated and becomes a thing of the past.

Item no: DVD12-10
Length: 15 minutes
Price: \$200.00

Computer Based Training

**Accident Investigation**

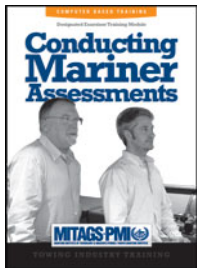

This course covers several topics, including the nature of accidents and how they occur, a step-by-step guide to carrying out effective accident investigation according to the type of accident that occurs, along with interview techniques and protocol.

Item no: CBT21-380
Price: \$385.00

**Catering and Hygiene**

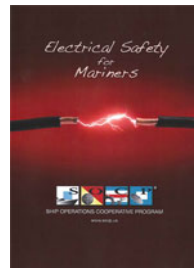

For galley staff and chef cooks, this course includes 16 cooking demonstration videos and recipes from various ethnic cuisines. The Hygiene course teaches how to safeguard food so it does not cause illness or harm.

Item no: CBT21-366
Price: \$385.00

**Conducting Mariner Assessments**

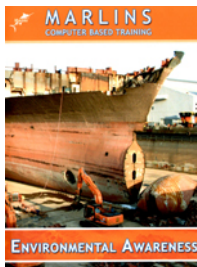

This course trains in assessment methods for mariners who want to sign off on STCW Competencies and also for those who serve as Designated Examiners for candidates for towing-vessel licenses and endorsements. Accepted as suitable training by the U.S. Coast Guard.

Item no: CBT30-01
Price: \$295.00

**Electrical Safety for Mariners**

Learn the best practices to reduce the risks associated with electrical systems aboard all types of commercial vessels in all types of service: oceangoing, coast wise, inland, and offshore.

Item no: CBT2-76
Length: 90 minutes
Price: \$225.00

**Environmental Awareness**

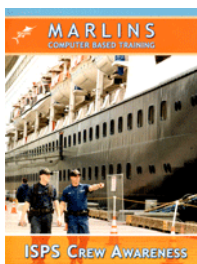

This course covers different types and sources of pollution at sea. It highlights international rules and regulations introduced to prevent and reduce pollution, as well as what are considered good practices for complying with these rules and regulations.

Item no: CBT21-384
Price: \$385.00

**Fuel Management**

Fuel Management is the handling of fuel from the moment it crosses the bulwark until it is burned. Doing it right is essential for the safe and efficient operation of the ship. There have been an increasing number of cases where ships were stopped for significant periods, unable to safely run their main or auxiliary engines. Poor fuel management cost the ship owners millions of dollars in damage and downtime each year.

Item no: CBT21-391
Price: \$385.00

**ISPS Crew Awareness**

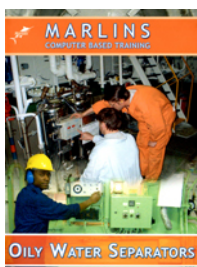

This course provides an overview of the Maritime Security Policy, as well as duties and responsibilities under the ISPS Code. It addresses global security threats and the measures to be taken at each security level. Lastly, it focuses on the contents of the Ship Security Plan.

Item no: CBT21-387
Price: \$385.00

**Lifeboat Training**

This course addresses the typical arrangements and equipment used on board, specific safety measures and Fall Preventer Devices (FPDs), as well as operating procedures for the different types of lifeboats. It provides an overview of IMO requirements and regulations including SOLAS and MSC Circulars.

Item no: CBT21-365
Price: \$385.00

**Oily Water Separators**

This course covers environmental problems caused by oil pollution and MARPOL regulations, as well as how oily water separators work, how to perform maintenance on it, and common issues associated with it. Also addressed is how oil content monitors work, what the Oil Record Book is, and how to complete it.

Item no: CBT21-383
Price: \$385.00

**Risk Assessment**

This course examines the aims and benefits of doing risk assessment. It outlines the key stages in carrying out effective risk assessment and management and provides students with a step-by-step practical guide to filling out a risk assessment form. Included is a simple chart that assists in calculating risk.

Item no: CBT21-385
Price: \$385.00

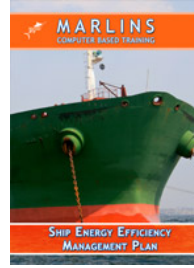

Computer Based Training

**Secure Anchoring and Effective Inspection**

Anchoring operations are common shipboard operations but still result in frequent incidents. Learn how to avoid these incidents by anchoring safely and effectively, preventing anchor loss.

Item no: CBT21-389

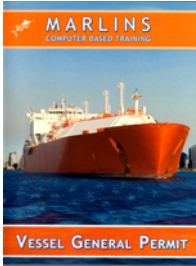

Price: \$385.00

**Ship Energy Efficiency Management Plan**

Carbon emissions caused by shipping could be reduced significantly if operational efficiency is improved on a large number of ships. Even a small improvement in operational efficiency across the global fleet can have a significant impact on carbon emissions. SEEMP became a mandatory tool in January 2013 and training is an essential part of the requirement. Marlins SEEMP Course will guide seafarers and vessel operators on how to reduce energy consumption on board and implement a SEEMP.

Item no: CBT21-390

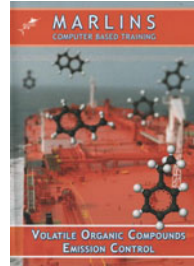

Price: \$385.00

**Vessel General Permit**

This course covers the background of VGP, as well as inspection requirements, corrective action assessments, documentation, and training requirements. Also included is an overview of vessel-specific and operation-specific requirements, such as bunkering and ballast operations.

Item no: CBT21-386

Price: \$385.00

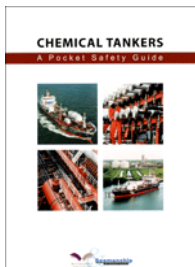

**Volatile Organic Compounds Emission Control**

Volatile Organic Compounds (VOC) can affect human health and the environment. Learn why and how to control VOC with this interactive program.

Item no: CBT21-388

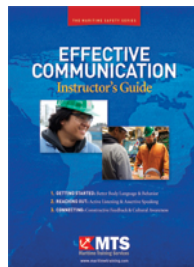

Price: \$385.00

Books

**Chemical Tankers: A Pocket Safety Guide**

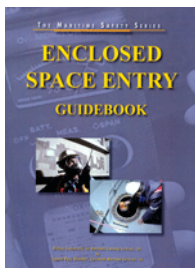

The booklet provides a good introduction and familiarization to Tanker practice, terminology, and standards. It is not intended as a detailed operational guide but is aimed at personnel with little or no experience.

Item no: B14-09
Length: 36 pages
Price: \$20.00

**Effective Communication Instructor's Guide**

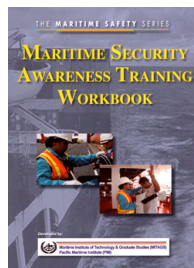

You don't need to be a professional trainer or facilitator to guide learners through this program. This 200-page guidebook provides different learning materials you can use to meet your own requirements and your learner's skill levels. It goes beyond traditional vocabulary drill and word memorization, teaching social skills and basic business communication standards. It's not an English language instruction program; it is about improving workplace behavior and building positive relationships.

Item no: B0-06
Length: 200 pages
Price: \$95.00

**Enclosed Space Entry Guidebook**

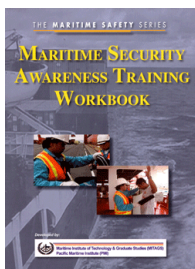

The Enclosed Space Entry Guidebook is designed to aid every mariner regardless of level or rank. It is full of helpful tips and reminders on how to stay safe, as well as a unique 2-level test: an easier one for those who are new to the training and a harder test for those who are skilled, yet need a refresher. Use with any or all of our Enclosed Space Entry training programs to maximize your learning experience.

Item no: B0-05
Length: 44 pages
Price: \$45.00

**Maritime Security Awareness Training Workbook**

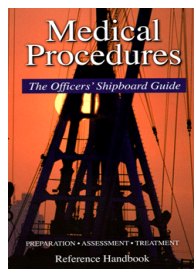

Developed by the Maritime Institute of Technology & Graduate Studies (MITAGS) and the Pacific Maritime Institute (PMI) with the assistance of the U.S. Coast Guard, the Workbook covers all topics needed to comply with the ISPS Code training requirements.

Item no: B0-04
Length: 16 pages
Price: \$45.00

**Maritime Security Awareness Training Workbook: Digital Version**

Developed by the Maritime Institute of Technology & Graduate Studies (MITAGS) and the Pacific Maritime Institute (PMI) with the assistance of the U.S. Coast Guard, the Workbook covers all topics needed to comply with the ISPS Code training requirements.

Item no: B0-04d
Length: 16 pages
Price: \$650.00

**Medical Procedures: The Officers' Shipboard Guidebook**

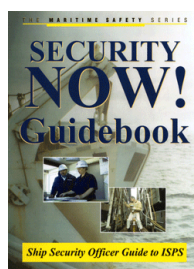

Don't let unnecessary casualties happen. A lack of medical knowledge leads to avoidable worsening of injuries. With three easy-to-follow sections, this book walks you through preparing, assessing, and treating several common injuries. This book was authored in conjunction with the program Medical Procedures and addresses its subject matter in greater detail.

Item no: B0-02
Length: 60 pages
Price: \$35.00

**Sargasso Sea Poster****Sargasso Sea Poster**

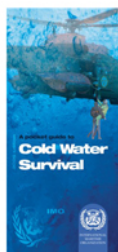

This British Admiralty chart includes high-quality images and information about endangered species and the consequences of environmental degradation.

Item no: P0-05
Price: \$10.00

**Security Now! Guidebook**

A great resource for your Ship Security Officer. Go in depth on various aspects of shipboard security, from security levels to your Ship Security Plan and company obligations. Coupled with the Security NOW! series, this book promotes an efficient ship security team by addressing ISPS Code specific topics and can be used as a guide to improve the overall security on board your vessel.

Item no: B0-07
Length: 26 pages
Price: \$45.00

**The Cold Water Survival Handbook**

The purpose of this guide is to examine the hazards of cold exposure that may endanger your life, and to provide you with advice on how to prevent and minimize those dangers. A thorough understanding of the information contained in this booklet may one day save your life. 2006 Edition.

Item no: B4-01
Length: 21 pages
Price: \$15.95

**Vessel General Permit 2013: Program Guide**

This comprehensive guidebook describes the technical details of VGP in simple terms and builds understanding for vessel operators and crews. We also offer a DVD to accompany this training guidebook to enhance your learning experience.

Item no: B0-08
Length: 25 pages
Price: \$45.00
